

OLUDAYO ALLI

I have a demonstrated history of working in the IT and financial industry and currently in the security industry with a passion to improve individual/corporate security with software solutions.

I develop commercial APIs with ASP.Net Core and currently shifting towards the new .Net 5. I also develop mobile applications using Xamarin Forms with a good eye for UI/UX.

As a way of helping others, I share video tutorials on YouTube and take up one-on-one mentees.
